metaVAR: Multivariate Meta-Analysis of Vector Autoregressive Model Estimates

Ivan Jacob Agaloos Pesigan

Description

Fits fixed-, random-, or mixed-effects multivariate meta-analysis models using vector autoregressive model estimates from each individual.

Installation

You can install the development version of `metaVAR` from GitHub with:

```
if (!require("remotes")) install.packages("remotes")
remotes::install_github("jeksterslab/metaVAR")
```

More Information

See GitHub Pages for package documentation.
